ABOUT CONFERENCE

Dear,

Every year Republic of Srpska loses many valuable human lives and incurs enormous economic costs due to road accidents.
The Economic Institute in Banja Luka has calculated that the total road accident costs were estimated in total from 2008 to 2024 at around EUR 1.9B.

In accordance with this, an international conference »Road Safety in the Local Community« is held each year, with the aim of constantly developing road safety capacities at the local level and creating groups of experts who will have enough enthusiasm, courage and willingness to fight with this problem that our country is facing.

Therefore, we invite all the authors and the professional community to participate in our next conference in raising awareness about the importance of road safety, as well as improving the situation in this area.

With respect,

Management Committee
